INTERNATIONAL FAMILY PROGRAM

INTERNATIONAL FAMILY PROGRAM

A wonderful opportunity for the whole family! You can experience Canadian culture with your child(ren) as they attend school to improve their English Language skills. FCA's International Family Program offers students from Kindergarten to Grade 5 an opportunity to study in Fredericton, New Brunswick, Canada. This program invites families to accompany their children for this English immersion program. FCA offers a caring and nurturing learning atmosphere. Students will be tested in English and developed accordingly while being part of the full school program.

International students will be given full ESL and academic support. When and as needed, academic expectations are modified to accommodate student's language challenges. Students will make new Canadian friends, become familiar with the Canadian education system, learn about new cultures and improve English proficiency.

FCA will work closely with parents and agents to find wonderful living accommodations near the school, explore different modes of transportation, set up bank accounts, get oriented to the local area, and ensure that all other settlement items are cared for. The settlement process includes airport pick-up, finding housing, support with vehicle purchases, insurances, community programs for parents, and various other items.

FCA Settlement Service provides assistance for study abroad students and accompanying families for a stable life in Canada. Based on years of experience, we do our best to help students and parents settle in Fredericton as quickly as possible and without any difficulties.
